

Ayush Kumar — Mock Interview CV

Objective

Aspiring Software Engineer with strong foundations in Data Structures, Algorithms, and Full-Stack Development. Skilled in building scalable web applications using React, Node.js, and databases. Eager to contribute to real-world

Education

Lovely Professional University	Jalandhar, Punjab
<i>Bachelor of Technology in Computer Science and Engineering, CGPA: 6.7</i>	2023-2027
Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Artificial Intelligence, Computer Networks, Software Engineering	
School Name	City, State
<i>Heritage International School, Percentage: 81.3%</i>	2023
Key Subjects: Physics, Chemistry, Mathematics, Computer Science	
School Name	City, State
<i>Rotary School, Percentage: 80.4%</i>	2021
Achievements: Include significant academic awards or distinctions if applicable.	

Technical Skills

Languages: C, C++, Python, JavaScript
Frontend: HTML, CSS, React.js
Backend: Node.js, Express.js
Databases: MySQL, MongoDB
Data Science: NumPy, Pandas
Tools: Git, GitHub

Projects

projects and grow as a problem solver in a dynamic development environment.

Code Reviewer | React.js, Node.js, Express.js

- Built a full-stack web application to analyze and review code
- Developed backend APIs to process code input and generate feedback
- Designed a user-friendly interface for displaying suggestions and improvements
- Implemented error handling for stable and reliable performance
- Followed modular coding practices for maintainability

Event Booking System | Next.js, Django, SQLite

- Developed a full-stack application for browsing events and booking tickets
- Implemented user authentication and role-based access control
- Designed RESTful APIs for event management and booking operations
- Built responsive UI for smooth user experience
- Ensured proper validation to prevent booking errors.

1/2

Certifications (If Applicable)

Generative AI & LLMs – Infosys (2025)

- Learned fundamentals of generative AI, prompt design, and real-world applications

ChatGPT & Prompt Engineering – Infosys (2025)

- Gained knowledge of effective prompt writing and AI-assisted workflows

Computer Communications – University of Colorado (Coursera)

- Covered networking concepts, protocols, and internet architecture

The Bits and Bytes of Computer Networking – Google

- Learned OSI model, TCP/IP, and network troubleshooting basics

AI Recommendations for Improvement

- Improve problem-solving skills by practicing more coding questions
- Learn backend development concepts more deeply
- Work on deploying projects on the internet
- Improve debugging skills to fix errors quickly

Self-Assigned Tasks (Till 10th week of this semester)

Task 1: Solve at least 100 coding questions to improve problem-solving skills

Task 2: Build and improve full-stack projects using React and Node.js

Task 3: Learn how to deploy projects on platforms like Vercel or Netlify

Task 4: Practice backend development concepts like APIs and authentication

Task 5: Improve debugging skills by fixing errors in projects.

Targets Allocated (Till 10th week of this semester)

Targets Approved by Course Instructor

- Complete certification in [Certification Name].
- Enroll in and complete [Specific MOOC or course].
- Finish the project titled "[Project Name]" to strengthen your CV.
